HikCentral FocSign V2.1.0

HikCentral FocSign is a lightweight platform with multiple functions, featuring diverse content types, predefined program templates, abundant material types, flexible layout design, integrated device management, etc. It can satisfy the needs of a variety of scenarios, such as commercial advertising, device integrated control and remote maintenance.

Key Features

Rich Content Creation

- Intuitive and user-friendly interface
- Various types of materials, including video, image, TXT, Word, audio, webpage, etc., making programs more creative and attractive

Convenient Program Management

- Quick, batch publishing of ready-made programs
- Flexible program schedule settings: Loop, play by date, week, or custom time period, or set as default program

Easy Terminal Configuration

- Setting brightness, password, and other parameters remotely
- Configuring terminals to start up, shut down, and volume on or off on a daily or weekly basis

Centralized Terminal Control

- Creating command groups and running them on multiple devices at once
- Installing applications on multiple devices

Specification
